

01 – Init

02 – Treadmill control

03 – Program set up flow

04 – Program setting method

Two method to set the program.

1. Step by step.
2. Final result.

If program flow start the edit state in the program number setting, the program setting will go step by step. If program flow start the enter state in the program setting, the program setting will go final result.

This example use (P01) LONG SLOW DIST-1 to explain.

Step by step flow

Final result flow
